Legrand CRM 5.0 awarded prestigious Gold Developer Status by Intuit Inc.

San Francisco – 12th June 2007 – Legrand Software is pleased to announce that it has been awarded Gold Developer status by Intuit Inc., one of the world's leading suppliers of financial management and accounting software.

The awarding of Gold Developer status involves extensive third party testing, peer review by independent QuickBooks Pro Advisors and customer feedback.

Legrand becomes one of only a small handful of CRM suppliers to have this Intuit accreditation.

Speaking today at the annual QuickBooks Enterprise Solutions Users Conference in San Diego, Mr Alain Legrand, founder and CEO of Legrand Software was thrilled at the announcement.

“This puts Legrand CRM in a very elite club. QuickBooks users can be absolutely assured that not only will the combination of QuickBooks and Legrand CRM help streamline the day to day running of their companies, but that Legrand CRM has been tested thoroughly by Intuit and found to integrate thoroughly and correctly with QuickBooks accounting software.”

Legrand CRM is an organization's central repository of customer data. The QuickBooks link enables you to easily transfer customers, vendors and even sales histories between itself and QuickBooks. The QuickBooks link provides tight coupling between CRM and accounting data, resulting in better information sharing and more efficient handling of customer enquiries.
